

TABLE OF CONTENTS

01

Sedona Tiny House

In this project I researched green products and universal design to create an eco-friendly tiny house. I also incorporated evidence based design and completed the model in SketchUp.

02

Hotel Project

This scope of this project was to create a set of construction documents for a hotel room using AutoCAD software. This included a floor plan, elevations, sections, details, and design concept images.

03

Loft Project

The scope of this project was to create a downtown loft space for a family from start to finish by working through each of the phases of design.

04

Historical Textile Design

The goal of this project was to design a contemporary textile based on a documented historic architectural detail or motif
